

# Advantage

- **Save the resources**
- **Portability**
- **They will help in reducing radiations caused by the Towers**
- **Less space consumption**

# Disadvantage

- High consumption of mobile battery
- It might increase the latency of the network

Latency == response time

## **Some common myths!**

- Mobile phones emits a harmful radiation

Fact:-

- Cell phones emit low levels of non-ionizing radiation when in use.
- Non-ionizing radiation is a form of radiation with less energy than ionizing radiation

It can run on different operating systems
